Education

VIT Bhopal University

B.Tech in Computer Science & Engineering (Specialization in AI & ML)

Bhopal, MP

Sep. 2024 – Jul. 2028

Central Board of Secondary Education

Intermediate(XII): 83.2%, Matriculation(X): 85.8%

Golaghat, AS

Jul. 2024

Experience

Data Analyst Intern

Jun. 2026

InAmigos Foundation

Remote

- Engineered data preprocessing pipelines using Python, SQL, Pandas, and NumPy to clean, validate, and transform structured datasets for downstream analytical workflows.
- Conducted exploratory data analysis (EDA) and statistical profiling to uncover trends, anomalies, and performance indicators, enabling data-driven business recommendations.
- Designed interactive Power BI dashboards integrating KPIs and dynamic visualizations, improving reporting efficiency and facilitating stakeholder decision-making.

Projects

Customer Shopping Behavior Analysis | Python, SQL, Power BI

May. 2026

- Analyzed a retail customer dataset containing 3,900+ records using Python, SQL, PostgreSQL, and Power BI to identify customer purchasing trends and business insights.
- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) using Pandas, NumPy, Matplotlib, and Seaborn.
- Built an interactive Power BI dashboard with KPIs, category-wise sales analysis, demographic insights, and seasonal purchasing trends to support data-driven decision-making.

ResearchGPT (Research Paper Assistant) | Python, FastAPI, LangChain, FAISS

Jun. 2026

- Developed an AI-powered Retrieval-Augmented Generation (RAG) application capable of processing and querying information from 50+ research papers, enabling context-aware question answering using semantic search and Google Gemini.
- Built a FastAPI backend supporting PDF uploads and arXiv URLs, performing automated text extraction with PyMuPDF and indexing over 10,000+ text chunks using FAISS for efficient similarity search.
- Designed a hybrid retrieval pipeline combining semantic search, keyword matching, and document-wide sampling, reducing irrelevant document retrieval and improving response quality across 100+ evaluation queries.

TrueVision (AI-Image Detector) | FastAPI, PyTorch, CNN, Grad-CAM

Jun. 2026

- Developed a full-stack AI web app detecting AI-generated images using a ResNet18 CNN fine-tuned via transfer learning on 120,000 labeled images (CIFAKE dataset), achieving 98.43 % validation accuracy across REAL vs. AI-generated classes.
- Designed and shipped a responsive React + Tailwind frontend with drag-and-drop image upload, connecting end-to-end to the PyTorch model across a 10MB file-size limit and 3 supported image formats (JPEG, PNG, WebP).
- Engineered a FastAPI backend serving real-time model inference through a REST API, integrating Grad-CAM explainability to generate heatmap visualizations highlighting the image regions driving each prediction.

Skills

Programming Languages: SQL, Python, C++, Java, HTML & CSS, LaTeX

Libraries: Scikit-learn, PyTorch, Pandas, NumPy, Matplotlib

Frameworks & Tools: FastAPI, REST APIs, LangChain, FAISS, React.js, Git, GitHub, Jupyter Notebook
